

QGIS Application - Bug report #16027

Editing GeoPackage from DWG/DXF Import after Save as Layer Definition File

2017-01-02 05:56 AM - Pedro Venâncio

Status: Closed	
Priority: Normal	
Assignee:	
Category: DWG/DXF import	
Affected QGIS version: 2.18.2	Regression?: No
Operating System: Linux/Windows	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: duplicate
Crashes QGIS or corrupts data: No	Copied to github as #: 23942
Description	
<p>After import a DWG with DWG/DXF Import, GeoPackage layers created can be edited by QGIS.</p> <p>Saving the GeoPackage group (containing the DWG data) as Layer Definition File (to preserve the style and symbology), closing QGIS, and then adding the QLR file with 'Layer' -> 'Add from Layer Definition File...', the edit mode (Toggle Editing button) is disabled.</p> <p>I've tested the same process (save and open as Layer Definition File) with other layers, and the edit mode works ok.</p> <p>Tested on Linux and Win10, with QGIS 2.18.2.</p>
