

QGIS Application - Feature request #16105

[Processing] Add lwgeom provider to core Processing

2017-01-24 01:29 AM - Filipe Dias

Status: Closed	
Priority: High	
Assignee: Victor Olaya	
Category: Processing/Core	
Pull Request or Patch Supplied:	Resolution: fixed/implemented
Easy fix?: No	Copied to github as #: 24017
Description	
<p>"Lwgeom" allows users to run the "Make valid" tool that can clean invalid geometries in shapefiles. Unfortunately invalid geometries are fairly common in many public datasets. Most QGIS geoprocessing tools throw an error when processing shapefiles with invalid geometries. However, there are no native tools in QGIS Processing for dealing with them. Make valid" from lwgeom is very very fast and would be a really good addition to QGIS Processing .</p>

Agreed, it would be an useful addition.

#2 - 2017-02-02 05:07 AM - Alexander Bruy

ST_MakeValid was added into QGIS API as well as Processing tool. I think we can close this

#3 - 2017-02-03 04:06 AM - Filipe Dias

- Resolution set to fixed/implemented

- Status changed from Open to Closed
