

## QGIS Application - Feature request #16127

### Add new parameter types and options for processing scripts

2017-01-29 08:12 AM - R. R.

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b> Victor Olaya	
<b>Category:</b> Processing/QGIS	
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b> fixed/implemented
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 24039
<b>Description</b>	
Radio buttons:  ##Radio_buttons=radio Value 1/Value 2/Value 3  Drop-down list:  ##Drop-down_list=drop Value 1/Value 2/Value 3  Using fields (number, string) without providing a value and an option to use placeholders would also be great.	

#### History

##### #1 - 2017-01-29 11:57 AM - R. R.

EDIT: Drop-down lists are already implemented:

```
units=selection sq_km;sq_miles;sq_degrees
```

[https://docs.qgis.org/2.14/en/docs/user\\_manual/processing/scripts.html](https://docs.qgis.org/2.14/en/docs/user_manual/processing/scripts.html)

##### #2 - 2017-04-21 11:59 AM - R. R.

Multiple tables:

```
##Input_layers=multiple table
```

##### #3 - 2017-04-21 12:06 PM - R. R.

CSV:

```
##Input_layer=csv
```

Multiple CSV:

```
##Input_layers=multiple csv
```

**#4 - 2017-05-01 12:44 AM - Giovanni Manghi**

- *Easy fix? set to No*

**#5 - 2018-02-08 10:37 AM - Alexander Bruy**

- *Resolution set to fixed/implemented*

- *Description updated*

- *Status changed from Open to Closed*

Now scripts use same syntax as qgis algorithms.
