

QGIS Application - Bug report #1613

Attribut table sorting doesn't work properly with postgis layers

2009-04-02 05:34 AM - cmoe -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: Data Provider	
Affected QGIS version:	Regression?: No
Operating System: RedHat	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 11673
Description	
Sorting an attribute table of a postgis layer doesn't work properly.	
1. load an postgis layer	
2. open the attribute table	
3. try to sort a column	
some columns sort properly, some will not sort at all, an some will show an error in every field of the table.	
It seems, that the behaviour depends on the postion of the column relativ to geometry column. If the column to sort is before the geometry column it works as expected, if it is after the geometry the column will not be sorted. If it is the column right after the geometry, all fields of the table will show an error.

Hi Juergen

less then 20 minutes for the fix, I guess it's a new (qgis/world-)record! Many thanks for the quick fix!

regards/Grüsse aus Solothurn
