

QGIS Application - Bug report #16137

QGIS Print composer prints maps with strange red lines

2017-01-31 08:14 AM - Luís de Sousa

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	2.14.10	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:		Resolution: not reproducible
Crashes QGIS or corrupts data:		Copied to github as #: 24049
Description		
<p>Hi there.</p> <p>I have this print composer composition on QGIS 2.14.11-Essen:</p> <p>http://i1293.photobucket.com/albums/b600/lads/PrintComposer01_zpsvctfykq.png</p> <p>But when I print this composition I get the following:</p> <p>http://i1293.photobucket.com/albums/b600/lads/QGIS2_zpsnzar2bdb.png</p> <p>Any quick fix? Or is this really a bug?</p> <p>Thank you.</p>

Hello! In order to get your bug "noticed" and easier to replicate, I would suggest adding test data, information regarding the system where you encountered the bug (Windows Xp?, Debian 8), if you replicated the bug on multiple computers, how to replicate the bug etc.

Thanks!

agree, sample data/project are really useful, after mandatory. Also can you specify the output format? is SVG? if yes what about PDF, same problem?
