| Crashes QGIS or corrupts data: | Copied to github as #: 24086 |

Description

Using the Help button in Metasearch plugin in (a localized) master version, it appears that it tries to open docs.qgis.org/2.99//docs/user_manual/plugins/plugins_metasearch.html link and returns a 404. I also wonder if it shouldn't rely on the new help system.

master 4b730c3

History

#1 - 2017-03-05 05:00 AM - Tom Kralidis

- Resolution set to fixed/implemented
- Status changed from Open to Closed

Fixed in 2.14 branch, 2.18 branch and master. Will be available on the next plugin release of MetaSearch or 2.14.13/2.18.5 on 24 March 2017 (whatever comes first)
