Yes it still appears like I described at my bug report. Today tested with QGIS 2.18.14 (QGIS-Codeversion: ff83b9a)

- Affected QGIS version changed from 2.18.3 to 2.18.14
- Operating System deleted (Windows)

Pull request proposed at <https://github.com/qgis/QGIS/pull/5730>. Should be fixed in next 2.18 minor release.

If the issue is also in master (next 3.0), then you could fix it yourself by joining the german translation team. It's really easy
