QGIS Application - Bug report #16188
osgeo64/processing: bag magic number in yaml

2017-02-13 11:46 PM - Richard Duivenvoorde

Status:	Closed			
Priority:	Normal			
Assignee:	Jürgen Fischer			
Category:	Windows Package			
Affected QGIS version:	master	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:		**Resolution:**	fixed/implemented	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	24098	

Description

Just installed current dev version (bb2a6c8) on Windows here (next to 2.14) which fails to start processing because of
ImportError: bad magic number in 'yaml': b'\\x03\\xf3\

\

'

see screendump

FYI: this is 64bit Windows Server 2008 R2 Enterprise install

History

- Category changed from Processing/Core to Windows Package

- Assignee changed from Victor Olaya to Jürgen Fischer

Reassigning to Jürgen- this seems an error in the yaml package itself, not in processing.

#2 - 2017-02-14 03:17 PM - Jürgen Fischer

Not reproducable here. Apparently it's a stale pyc. Is python3-pyyaml installed? qgis-dev depends on it.

#3 - 2017-02-14 03:17 PM - Jürgen Fischer

- Status changed from Open to Feedback

#4 - 2017-02-14 05:16 PM - Nyall Dawson

Ok - confirmed. Removing all .pyc files from the osgeo4w folder and restarting fixed this for me.

#5 - 2017-02-14 10:59 PM - Richard Duivenvoorde

Thanks for looking into it. I cannot confirm untill next week when I'm working on that machine again.

So this is a left over from a qgis.2x run in the same folder?
Could be because I installed from an excisting osgeo4w install/folder.

What I'm curious now for is if this could also happen when you install both 2.x and 3/2.99 in same osgeo4w64 folder and first run 2.x (generating .pyc files)

and then try to run 3 (picking up those files?)...

Feel free to close it, I will open it when it does not fix my problem.

The python3 and python2 installs are different directories. Interesting would be which file it actually is.

That should work.

#7 - 2017-02-23 12:08 AM - Jérôme Guélat

I had the same problem... Deleting C:\\OSGeo4W64\\apps\\qgis-dev\\python\\yaml__init__.pyc seemed to help...

Is it safe to remove it?

#8 - 2017-02-23 12:46 AM - Jürgen Fischer
- Status changed from Feedback to Closed
- Resolution set to fixed/implemented

Yes - that's from an previous python2 based qgis-dev. Fixed in commit:702d4cc1.

#9 - 2017-02-23 02:03 AM - Richard Duivenvoorde

Yep, confirmed here too. Removed all *.pyc files and works!
