

QGIS Application - Bug report #16231

Metasearch: Add WMS/WMTS and WFS does not work

2017-02-24 09:45 AM - Paolo Cavallini

<b>Status:</b>	Closed	
<b>Priority:</b>	Normal	
<b>Assignee:</b>	Tom Kralidis	
<b>Category:</b>	MetaSearch Catalogue Client	
<b>Affected QGIS version:</b>	2.18.3	<b>Regression?:</b> No
<b>Operating System:</b>	Ubuntu	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	No	<b>Resolution:</b> not reproducible
<b>Crashes QGIS or corrupts data:</b>	No	<b>Copied to github as #:</b> 24141
<b>Description</b> <ul style="list-style-type: none"><li>- open Metasearch</li><li>- add default servers</li><li>- search something (e.g. 'land' on Geoportale Nazionale)</li><li>- click on "Add WMS/WMTS"</li><li>- Add WMS dialog pops up</li><li>- it does nothing until if times out</li><li>- the entry is added to the browser, and it works fine when reopened.</li></ul> <p>Could this be due to translation? Here we tested in Italian, on many different machines (Debian and various Win).</p>

Paolo: thanks for the info. I cannot reproduce even when starting 2.18 with --lang it. Can you provide more specific steps after performing the search? Perhaps the issue shows up for a specific result.

#2 - 2017-03-05 05:40 AM - Paolo Cavallini

Thanks Tom for checking. Testing with a fresh `--configpath` indeed does not show the issue. This may therefore be due to another plugin, tricky to find. You may close it if you wish.

#3 - 2017-03-05 06:07 AM - Tom Kralidis

- Resolution set to not reproducible
- Status changed from Open to Closed
