QGIS Application - Feature request #1625
document how to write GRASS modules

2009-04-05 01:38 AM - Paolo Cavallini

Status:	Closed		
Priority:	Low		
Assignee:	nobody -		
Category:	GRASS		
Pull Request or Patch supplied:		**Resolution:**	fixed
Easy fix?:	No	**Copied to github as #:**	11685

Description

I cannot find anywhere a description of how to write a GRASS module. Currently it is rather easy to write new ones just by copying the existing ones, but it is difficult to understand how to edit them in case something does not work as expected.

It would be good to have more details (see eg notes on #1617#comment:3)
