

## QGIS Application - Bug report #16259

### Processing Refactor Fields tool: some field types appear twice in the list

2017-03-02 08:34 AM - Harrissou Santanna

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b> Victor Olaya	
<b>Category:</b> Processing/QGIS	
<b>Affected QGIS version:</b> master	<b>Regression?:</b> No
<b>Operating System:</b>	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 24169
<b>Description</b>	
In the Processing tool Refactor Fields, using a shapefile, I get twice "Double" and "Date" values in the Type column drop-down.	
master f354a85, Windows 10	

#### History

##### #1 - 2017-03-02 09:15 AM - Giovanni Manghi

It affects also 2.18 and 2.14, so it seems never worked 100% ok.

##### #2 - 2017-04-04 03:14 AM - Victor Olaya

Looks like it's intentional

```
fieldTypes = OrderedDict([
    (QVariant.Int, "Integer"),
    (QVariant.Double, "Double"),
    (QVariant.String, "String"),
    (QVariant.DateTime, "Date"),
    (QVariant.LongLong, "Double"),
    (QVariant.Date, "Date")])
```

I guess that Arnaud Morvan is the one that can give more info about that, since it is his work. Reassigning to him

##### #3 - 2017-05-01 01:01 AM - Giovanni Manghi

- Easy fix? set to No

- Regression? set to No

##### #4 - 2018-02-02 09:11 AM - Alexander Bruy

- Status changed from Open to Closed

- Description updated

- Resolution set to fixed/implemented

Already fixed in master.
