

QGIS Application - Feature request #1628

r.out.tiff: does not allow selection of destination directory

2009-04-05 01:47 AM - Paolo Cavallini

Status:	Closed	
Priority:	Low	
Assignee:	Lorenzo Masini	
Category:	GRASS	
Pull Request or Patch supplied:		Resolution: fixed
Easy fix?:	No	Copied to github as #: 11688
Description		
When exporting a raster to a tiff with r.out.tiff, the user cannot select the destination directory. The tiff gets saved to the home directory, but this should be a choice of the user.		

History

#1 - 2009-06-10 09:09 AM - Paolo Cavallini

The code differences are:

r.out.bin:

```
75  parm.output = G_define_option();
76  parm.output->key = "output";
77  parm.output->type = TYPE_STRING;
78  parm.output->required = NO;
79  parm.output->description =
80  _("Name for output binary map (use output=- for stdout)");
```

but r.out.tiff:

```
106  outopt = G_define_option();
107  outopt->key = "output";
108  outopt->type = TYPE_STRING;
109  outopt->required = YES;
110  outopt->gisprompt = "new_file,tiff,tiff";
111  outopt->description = _("Name for new TIFF file");
```

Apparently the presence of gisprompt disactivates the directory browse button in QGIS.

#2 - 2009-06-17 07:52 AM - Lorenzo Masini

- Status changed from Open to Closed
- Resolution set to fixed

The problem was in the r.out.tiff.qgm module.
Fixed in commit:7b08127b (SVN r10945).
