QGIS Application - Bug report #16295
DB Manager: error importing data into GPKG connections

2017-03-06 08:11 AM - Giovanni Manghi

Status:	Closed			
Priority:	Severe/Regression			
Assignee:	Even Rouault			
Category:	DB Manager			
Affected QGIS version:	2.18.4		**Regression?:**	No
Operating System:			**Easy fix?:**	No
Pull Request or Patch supplied:			**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:			**Copied to github as #:**	24205

Description

The same type of errors shows regardless the input datasource and regardless the operation is done by D&D or by using the "import layer/file" dialog:

Error 3
creation of layer failed (OGR error:Failed to open Shapefile `dbname='/home/giovanni/Desktop/azo.gpkg' key='gid' table="fp" (geom) sql=.shp'.
)

I respectfully tag this as "severe" as a functionality (the support for GPKG connections in DB Manager) that since implemented has **never** worked the proper way.
