Pull Request or Patch supplied: Resolution:

Easy fix?: No Copied to github as #: 24217

## Description

If I want to remove a line from my batch process, the interface only allows me to remove the last line of the entire list. This is a problem when I use saved batch settings because I may only want to run the last few lines in the batch process but there is no way to remove the first lines.

## How to replicate:

- 1. Open a batch process dialog
- 2. Add multiple lines
- 3. Select the top line
- 4. Click the button to remove a line

#### What happens:

The last line in the batch process is removed.

What should happen:

The line that is selected is removed.
