<b>Pull Request or Patch supplied:</b>	No	
<b>Easy fix?:</b>	No	
<b>Description</b>		
<p>Presently, pressing tab on the batch processing interface changes the selection of the entire row. It would make much more sense to allow for tab to move the cursor to the next logical input. My preference would be to advance the cursor to the next row down in the same column, although you could make a case for advancing to the next column in the row.</p>
