

## QGIS Application - Bug report #16309

### Saved batch processing inputs are not restored in a useful state

2017-03-07 09:11 AM - Spencer Gardner

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Processing/Core	
<b>Affected QGIS version:</b> 2.18.4	<b>Regression?:</b> No
<b>Operating System:</b>	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 24219
<b>Description</b>	
<p>I have a batch processing routine that I have saved to .json format for repeated use. When I reload the batch configuration it encloses layer references in double quotes, which causes an error when running the batch process. In order to make things work I have to manually remove the double quotes from all layer references.</p> <p>How to reproduce:</p> <ol style="list-style-type: none"><li>1. Create a batch process and save to .json</li><li>2. Close the dialog and reopen</li><li>3. Load the saved .json file</li></ol> <p>What happens:</p> <p>Layer references are enclosed in double quotes, which causes an error when the tool is run.</p> <p>What should happen:</p> <p>Layer references are not enclosed in anything and the tool runs successfully without needing further user input.</p>
