QGIS Application - Bug report #16371
Continuous vector color scale

2017-03-22 07:26 AM - belg4mit -

Status:	Closed		
Priority:	Normal		
Assignee:			
Category:	Vectors		
Affected QGIS version:	2.18.3	**Regression?:**	No
Operating System:		**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	fixed/implemented
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	24281

Description

The ability to have a continuous color scales for vectors seems to have been removed in recent versions. If it is still present, the online documentation http://docs.qgis.org/2.18/en/docs/gentle_gis_introduction/vector_attribute_data.html#continuous-colour-symbols should be updated to include the procedure for using it; it currently features some very old screenshots and outdated procedures. If it has been removed, why? Can it be restored?

History

#1 - 2017-03-22 12:09 PM - Nyall Dawson

- Resolution set to fixed/implemented

- Status changed from Open to Closed

That's implemented again in master using data defined colour assistant.
