

QGIS Application - Feature request #1639

New vector layer SRS

2009-04-17 12:12 AM - doktoreas -

Status: Closed	
Priority: Low	
Assignee: Redmine Admin	
Category: Projection Support	
Pull Request or Patch supplied:	Resolution: fixed
Easy fix?: No	Copied to github as #: 11699
Description	
<p>Hello folks,</p> <p>I think would be good to have an option for choosing the SRS when creating a new vector layer.</p> <p>This could be done in some ways:</p> <ul style="list-style-type: none">- Using the same SRS of the project- Prompt user for the SRS list just like is done with save as shapefile <p>What do you think?</p> <p>Bye Luca</p>

- Resolution set to worksforme
- Status changed from Open to Closed

That's already available. In the CRS tab of Settings/Options you can select if you want to be prompted for a CRS, use the project's CRS or a preselected CRS. That setting is also used when creating new shape files.

#2 - 2009-04-17 09:29 AM - Maciej Sieczka -

- Resolution deleted (worksforme)

That's already available. In the CRS tab of Settings/Options you can select if you want to be prompted for a CRS, use the project's CRS or a preselected CRS. That setting is also used when creating new shape files.

Loading an existing layer and creating a new one are 2 separate things.

I believe that a CRS of a newly created layer should be handled by a separate setting in Settings>Options, defaulting to inheriting the CRS of the current project.

The existing Settings>Options>CRS implicitly states it is for "When layer is **loaded** that has no CRS".

#4 - 2009-08-26 02:04 AM - Magnus Homann

- *Status changed from Open to Closed*

- *Resolution set to fixed*

I changed the wording to include newly created layers, the difference is not that big that it warrants a separate setting. Fixed in .
