QGIS Application - Bug report #1642
v.to.db GRASS tool interface problem

2009-04-20 05:38 AM - mvizzari -

Status:	Closed		
Priority:	Low		
Assignee:	Lorenzo Masini		
Category:	GRASS		
Affected QGIS version:		**Regression?:**	No
Operating System:	Windows	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	11702

Description

the v.to.db GRASS tool interface of qGIS when activated doesn't find the key column and has not the parameter of the column to be updated.

Thanks a lot for your work!!

History

It does show the column list, but it does not update it if the module is already opened when a layer is loaded. To check, close the module, load a layer and see if you can see the list of columns.
However, I found another problem: the module does not work if you want to update several columns, as it happens for X.Y coordinates (this option requires two columns, but the module can only add one):

v.to.db map=boundary_county@user1 layer=1 option=coor units=meters columns=Z_MEAN

°ß¸This option requires at least two columns

- Resolution set to fixed

- Status changed from Open to Closed

Fixed the attribute table update issue in commit:4fe683b3 (SVN r11344).

For the multiple input issue, open an other ticket.
