

QGIS Application - Feature request #16432

Update the field list in layer.dataProvider().forceReload()

2017-04-10 01:42 PM - Borys Jurgiel

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Data Provider	
Pull Request or Patch supplied:		Resolution: wontfix
Easy fix?:	No	Copied to github as #: 24341
Description		
<p>Once you load e.g. postgres table into QGIS, there is no way to reload its fields (e.g. after adding a column via psycopg or other concurrent connection), except reloading the whole project of course. The layer.dataProvider().forceReload() assumes the fields structure is constant and only reloads the records.</p> <p>I noticed it when working with PostGIS, but I suspect it's a provider-independent issue.</p>
