Crashes QGIS or corrupts data:		Copied to github as #: 24383
Description		
<p>See #16473</p> <p>It is a copy/paste from the new Oh Uh! dialog to report crashes in QGIS. I think there's an issue with the title level and what I guess is supposed to be their underlining adornment ('==='); it appears on the same line instead of being under. Also, it would need some bolding or whatever to easily distinguish sections.</p>
