

## QGIS Application - Feature request #16499

### Custom python function is not available when sharing projects

2017-05-02 04:09 PM - Arnaud Poncet-Montanges

<b>Status:</b> Open	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Python plugins	
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b>
<b>Easy fix?:</b> No	<b>Copied to github as #:</b> 24405
<b>Description</b>	
<p>Defining a custom function in the composer is not loaded when reopening .qgs project.</p> <p>This requires the user to go to the expression field and load manually the custom function.</p> <p>When defining a custom function, the user should be able to set if the function needs to be run</p> <ul style="list-style-type: none"><li>- at every qgis start,</li><li>- only associated with a specific project</li><li>- or only on demand.</li></ul> <p>Is there a simple way through macros or init scripts to load custom functions at a specific .qgs start?</p>
