

QGIS Application - Bug report #16525

QGis 2.14.14 fails to start on Windows XP

2017-05-05 11:51 PM - C M

Status:	Closed	
Priority:	Normal	
Assignee:	Jürgen Fischer	
Category:	Build/Install	
Affected QGIS version:	2.14.14	Regression?: Yes
Operating System:	MS Windows XP	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 24431
Description		
<p>Hi,</p> <p>I have installed QGis 2.14.13 on Windows XP (in a virtual machine) and this works fine.</p> <p>Since version 2.14.14 QGis doesn't work on Windows XP. When launching QGis I have the following message:</p> <p>The procedure entry point GetTickCount64 could not be located in the dynamic link library KERNEL32.dll.</p> <p>This error is due to libcurl.dll that needs this procedure. The 2.14.13 version of QGis provides another version of cUrl that doesn't depend on this procedure. When copying & replacing libcurl.dll from version 2.14.13 to 2.14.14, QGis starts successfully.</p>
