

QGIS Application - Bug report #16531

DB manager/browser should not show the schemas/tables the user has no permission on

2017-05-09 01:29 PM - Giovanni Manghi

Status:	Feedback	
Priority:	Normal	
Assignee:		
Category:	DB Manager	
Affected QGIS version:	master	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch supplied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 24437
Description		
<p>When choosing the "add PostGIS layer" dialog the user is presented with ONLY the schemas he/she has permission (USAGE) on.</p> <p>On the other hand in DB Manager and Browser the user is also presented with the schemas that he/she cannot use, the tables are also listed in DB Manager (not the browser) but if the user tries to add them gets an error.</p> <p>For sake of consistency those schemas should be shown to the user.</p>
