Crashes QGIS or corrupts data:	No	**Copied to github as #:**	24455	

Description

Last week I installed QGIS version 2.18.7 on my MacBook Pro. Afterwards I tried to install several plugins like PDOK Service. QGIS works good, but the Python Console doesn't work for some reason.
I added a file containing the screen dump with error code. Python also gives error with the plugins QuickMapServices en Google2street.

I would like to have some advise to solve this problem. Any idea?

- Status changed from Open to Feedback

Remove/Disable any 3rd party plugins, restart QGIS and try again. Thanks.

#2 - 2017-09-25 04:42 PM - Giovanni Manghi

- Resolution set to not reproducable

- Status changed from Feedback to Closed

Closing for lack of feedback, please reopen if necessary.
