

QGIS Application - Bug report #1655

Lacking translation causes malfunction

2009-04-25 01:34 PM - vince -

Status: Closed	
Priority: Low	
Assignee: nobody -	
Category: C++ Plugins	
Affected QGIS version:	Regression?: No
Operating System: OS X	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed
Crashes QGIS or corrupts data:	Copied to github as #: 11715
Description	
<p>When a release is done (here, e.g. 1.1.0), please insure all the translation for major item are available, otherwise I18 versions sometimes won't work.</p> <p>For exemple, the 1.1.0 does not include a translation for the tr ("Shapefile ...") found in line 170 of qgsspit.cpp. As a result, the corresponding file selector will be called with a null filter, and the user won't be able to pick any file. Getting rid of the tr () fixes the misbehaviour (temporarily, until a proper translation will be available).</p>

| *PS : this concerns the French version*

what's wrong with the translation in line 20041 of qgis_fr.ts?

#3 - 2009-04-26 12:32 AM - vince -

It has a unique ; instead of a ;; separator. That makes it non-functional. Sorry for that, I thought the translation was non-existent, so I didn't check. Will modify it.

Besides, I've joined what the File Dialog Box looks like on my Mac: it is impossible to select the encoding, the corresponding box does not appear on screen. But I'll try to fix the translation first, then try again.

#4 - 2009-04-26 02:43 AM - vince -

I've quickly reviewed the French translation. It is a bit approximative (typing errors here and there, a lot of things lacking), so I'll update it and propose you an up-to-date version.

#5 - 2009-04-26 03:38 PM - Jürgen Fischer

- Resolution set to fixed
- Status changed from Open to Closed

I've fixed the bug in the dialog translation in commit:1819a5dc (SVN r10656), but all additional improvements are still most welcome.
