QGIS Application - Bug report #16567
Shear values iin transform effect are not being saved

2017-05-17 03:15 PM - Alexandre Neto

Status:	Closed		
Priority:	Low		
Assignee:			
Category:	Symbology		
Affected QGIS version:	master	**Regression?:**	No
Operating System:	Linux ubuntu	**Easy fix?:**	No
Pull Request or Patch supplied:	No	**Resolution:**	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	24469

Description

The shear values in the transform effect on features are not being save with the project, and are not copied when the user duplicate the layer or copy/paste the style.

To reproduce, in a Point layer do:

- style the layer with a SVG Marker with a large size (to be visible);
- Add draw effects at symbol layer level;
- Apply a Transform effect that includes Shear values (see screenshoot)

Things to try:
- Duplicate the layer, the style will be changed not taking the shear values
- Try copy past the style, it wont work either
- Save the project, and open it again. The effect of the original layer will also not include the shrear values.

this is affecting 2.18 and master
