

QGIS Application - Feature request #16582
Add the tiny button "SQL query composer" of the db manager in 'Add virtual layer' window

2017-05-19 05:48 PM - Julien Monticolo

Status:	Open	Resolution: Copied to github as #: 24484
Priority:	Normal	
Assignee:		
Category:	Virtual Layers	
Pull Request or Patch supplied:	No	
Easy fix?:	No	
Description		
Hello, Is there a way to go straight to the SQL query composer of the db manager in the 'Add virtual layer' window, just by add the tiny button ?

I think you should also raise your need to the French ministry of ecology that coordinates this and did the initial funding for virtual layers.
If you can support that feature, please consider finding some commercial support here: https://www.qgis.org/fr/site/forusers/commercial_support.html
