

QGIS Application - Bug report #16584

QGIS crashes each time i hit OK from the Settings --> options dialog

2017-05-19 06:48 PM - Harrissou Santanna

Status: Closed	
Priority: High	
Assignee:	
Category: GUI	
Affected QGIS version: master	Regression?: Yes
Operating System: Windows 10	Easy fix?: No
Pull Request or Patch supplied: No	Resolution:
Crashes QGIS or corrupts data: Yes	Copied to github as #: 24486

Description

User Feedback

I encounter this issue while modifying value of the Settings --> Options --> Data Sources --> Attribute table behavior. As soon as I hit **Apply**, BOOM! (note that my change is however saved)

Trying to reproduce the bug for the issue report, I found that QGIS crashes each time I hit the OK button of the Options dialog (no matter if I change a setting or not). Hitting Cancel or closing with the cross does not crash QGIS.

PS: I'm not sure about the category I selected!!!

Report Details

History

#1 - 2017-11-06 03:07 PM - Matthias Kuhn

- Status changed from Open to Feedback

Is this still an issue? I assume we would have a lot more feedback here if this was still an issue, as there are a lot of people daily using this button repeatedly ;)

#2 - 2017-11-06 03:15 PM - Harrissou Santanna

- *Status changed from Feedback to Closed*

Closing given that I can not reproduce.
