QGIS Application - Bug report #16588
Cannot save duplicated layer back to GeoPackage

2017-05-21 07:14 AM - Eron Lloyd

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	Data Provider			
Affected QGIS version:	2.18.7	**Regression?:**	No	
Operating System:		**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	invalid	
Crashes QGIS or corrupts data:	No	**Copied to github as #:**	24490	

Description

When I duplicate a layer in a GeoPackage, I cannot save that layer back to the same GeoPackage. Instead, I get an error message stating "Export to vector file failed. Error: Cannot overwrite a OGR layer in place." However, if I save the duplicated layer to another GeoPackage, and then save it back into the original one, it works. The issue consistently occurs each time.

History

#1 - 2017-05-21 10:11 AM - Giovanni Manghi

- Operating System deleted (OS X)

- Status changed from Open to Feedback

To me sounds like is expected. The duplicate layer **is not** a different datasource from the original one, is exactly the same, just with a another name in the layer tree.

#2 - 2017-09-25 04:43 PM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Feedback to Closed

Closing for lack of feedback, please reopen if necessary.
