- *Operating System deleted (Windows 7 / Linux Ubuntu 16.04)*

- *Category changed from Field calculator to Expressions*

This regression was introduced since commit:2185d42dbcd81be4e45498cdacd82ee74fcb59c7 in order to fix the issue #15633.

I think that commit should be reverted and then finding a better fix for the processing field calculator.

Thinking to some solution for the processing field calculator, I guess we need to reset/remove scope from context when switching between layers.

Anyway, [here](#) I done a patch if we want leave things like they are now, without reverting the above commit.
