Affected QGIS version:	2.18.7	**Regression?:**	No	
Operating System:	Debian 9.0	**Easy fix?:**	No	
Pull Request or Patch supplied:	No	**Resolution:**	not reproducable	
Crashes QGIS or corrupts data:	Yes	**Copied to github as #:**	24493	

Description

Hello,

Every time I try to open the styling page "Rules-based" in the properties menu, QGIS freezes and I have to kill it.

History

#1 - 2017-05-22 05:23 PM - Giovanni Manghi

- Priority changed from Normal to High

- Status changed from Open to Feedback

- Category changed from Actions to Symbology

Just tries this on Ubuntu/2.18.8, even with a very large vector and a very large number of rules. Please:

- disable/remove all 3rd party plugins and restart qgis

and/or

- provide sample project and data

thanks.

#2 - 2017-07-27 03:43 PM - Giovanni Manghi

- Resolution set to not reproducable

- Status changed from Feedback to Closed

closing for lack of feedback.
