

QGIS Application - Bug report #16608

Importing or exporting to gpx does not work

2017-05-24 09:47 AM - salvatore fiandaca

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Data Provider	
Affected QGIS version:	2.18.8	Regression?: Yes
Operating System:	windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: invalid
Crashes QGIS or corrupts data:	No	Copied to github as #: 24508
Description		
Steps to run: 1. Upload a punctual shapefile; 2. save by name; 3. select GPX; 4. import the file; You will get a message see screenshot and will not load anything		

History

#1 - 2017-05-24 09:51 AM - Paolo Cavallini

An user also reported a crash, unverified, on Windows.

#2 - 2017-05-24 09:57 AM - Giovanni Manghi

- Resolution set to invalid
- Status changed from Open to Feedback

That dialog is normal, the fact that says "0" features means "nothing": years ago for some reason the count of the type of features in a gpx file was disabled. When the dialog open, selects the type of features you want to load and press ok, and they will be loaded in the main map.

Just tested on 2.18.8 on Windows and Linux.

- File N2.jpg added

Here is another screenshot, empty attribute table

#4 - 2017-05-24 10:09 AM - salvatore fiandaca

sorry,
it works!!!
