

QGIS Application - Bug report #16610

Composer: Item Properties: expanded items resetting

2017-05-24 11:02 AM - Night yb

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Map Composer/Printing	
Affected QGIS version:	master	Regression?: Yes
Operating System:	Win8.1	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	No	Copied to github as #: 24510
Description The <i>Item Properties</i> panel resets to the default configuration of expanded/collapsed property groups when selecting items. This is not the case in 2.18, which restores the previous state as expected. Steps to reproduce: 1. -> New project 2. -> New print composer 3. add two rectangle shapes 4. select the first rectangle 5. expand the <i>Position and size</i> property subgroup in the <i>Item Properties</i> panel 6. select the second rectangle 7. select the first rectangle 8. <i>Position and size</i> is now collapsed QGIS version: 2.99.0-Master d55fa22
