

## QGIS Application - Bug report #16612

### QGIS crashes when adding PostGIS layers from Browser panel

2017-05-24 02:16 PM - Ross McDonald

<b>Status:</b> Closed	
<b>Priority:</b> High	
<b>Assignee:</b>	
<b>Category:</b> Browser	
<b>Affected QGIS version:</b> 2.18.8	<b>Regression?:</b> No
<b>Operating System:</b> Windows 7 x64	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 24512
<b>Description</b>	
Using latest QGIS 2.18.8 (cde1d78) x64 version on Windows 7 x64 I can cause a crash and minidump by trying to add PostGIS layers from the Browser panel. Adding the same layers in the same way with 2.14.15 works fine.

#### History

##### #1 - 2017-05-24 02:17 PM - Giovanni Manghi

- Resolution set to fixed/implemented
- Status changed from Open to Closed

this was already fixed, wait a new build (2.18.9, probably soon), downgrade or use the classic "add postgis layer" dialog.

##### #2 - 2017-05-26 01:46 PM - Jürgen Fischer

- Duplicates Bug report #16593: Segmentation fault when importing CSV file with coordinates added
