<b>Description</b>	
<p>When using the new unified "Add data" button, it seems that the File Selector sometimes opens behind the Data Source Manager, when the user clicks on "Browse"</p> <p>Screencast here: <a href="https://vimeo.com/220330186">https://vimeo.com/220330186</a></p>	

#### History

##### #1 - 2017-06-06 01:05 PM - Alessandro Pasotti

I cannot reproduce this on KDE/Linux. Maybe something specific to Ubuntu Unity?

I tested with modal and modeless options.

##### #2 - 2017-07-06 09:26 AM - Frank Sokolic

I also get the same thing on Ubuntu 17.10 (Unity desktop) but it also affects other things, not only the Data Source Manager.

If I right click on a vector layer in the Layers Panel and select **Save As...** and then **Browse** the File Selector opens in the background.

It seems like this bug is due to something else, not the Data Source Manager.

##### #3 - 2017-11-21 09:29 AM - Alessandro Pasotti

- Resolution set to up/downstream

- Status changed from Open to Closed
