

QGIS Application - Bug report #16667

Vector field marker length attribute not stored in QML

2017-06-05 09:47 PM - Nick Cook

Status:	Closed	
Priority:	Normal	
Assignee:		
Category:	Symbology	
Affected QGIS version:	2.18.3	Regression?: No
Operating System:	64 Bit Windows 10	Easy fix?: No
Pull Request or Patch supplied:	No	Resolution: not reproducible
Crashes QGIS or corrupts data:	No	Copied to github as #: 24566
Description		
<p>Hi,</p> <p>I have a vector field and then rule based simple points created. In saving the layer definition file, the length attribute field is missing after loading. Not fatal.. I put under vectors as I could not find the layer definition option in Category below.</p> <p>Many thanks, Nick Cook</p>

 - Subject changed from Saving of layer definition file to Vector field marker length attribute not stored in QML

Hi Nick! I've tried reproducing this issue with 2.18.9 but it all seems to work correctly here.

Can you give the new version a try?
