

## QGIS Application - Bug report #16676

### Invalid fields error when using "Use completer" in Layer properties Edit widget:Value Relation

2017-06-07 11:39 AM - Pawel Baziuk

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Edit widget	
<b>Affected QGIS version:</b> 2.18.9	<b>Regression?:</b> No
<b>Operating System:</b> Windows 7	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> Yes	<b>Resolution:</b> fixed/implemented
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 24575
<b>Description</b>	
<p>I've made a field in a layer without NULL and connected it by relation to a fixed list of values from another layer by using Edit widget:Value Relation. Then I checked "Use completer" option in that widget to use an edit line in this field (you can see it in the picture attached).</p> <p>When I make a new object in that layer and complete a value by editing it, I always get invalid field error just like I would still have null in that field. I can't put any objects in that layer.</p> <p>When I uncheck "Use completer" in edit widget, then I have to use a combobox in that field and this way gives no error.</p> <p>So using field properties: without NULL, Edit widget:Value Relation with Use completer checked - gives error when creating any object in that layer.</p>	

#### Associated revisions

##### Revision 51ec70ab - 2017-12-05 01:41 PM - Frank Dekervel

Fix missing signal/slot connection resulting in non-working autocompleter for value relation fields (fixes #16676).

This oneliner introduces the missing signal/slot connection, and fixes the bug.

##### Revision 920d760e - 2017-12-09 11:40 AM - Frank Dekervel

Fix missing signal/slot connection resulting in non-working autocompleter for value relation fields (fixes #16676). (#5821)
