#1 - 2017-06-12 09:58 PM - Greg Cocks

- File qgis_latest_version_project.jpg added

#2 - 2017-06-13 01:55 PM - Giovanni Manghi

- Crashes QGIS or corrupts data changed from Yes to No

- Priority changed from Normal to High

- Subject changed from QGIS v2.18.9 - GeoJSON URLs can't be added and previous version *.qgs with them in 'break' to GeoJSON URLs (https) can't be added to projects in 2.18.9 (worked in previous 2.18 point releases)

Notes:

in the QGIS log you will see

2017-06-13T12:30:01	1	Data source is invalid (SSL certificate problem: self signed certificate in certificate chain)
2017-06-13T12:30:01	1	Data source is invalid (SSL certificate problem: self signed certificate in certificate chain)
2017-06-13T12:30:02	1	Data source is invalid (SSL certificate problem: self signed certificate in certificate chain)

2017-06-13T12:30:03 1 Data source is invalid (SSL certificate problem: self signed certificate in certificate chain) 2017-06-13T12:30:03 1 Data source is invalid (SSL certificate problem: self signed certificate in certificate chain)

2017-06-13T12:30:05 1 Data source is invalid (SSL certificate problem: self signed certificate in certificate chain)

so seems something related to the fact that this datasources comes via HTTPS and the certificates used in that sites.

Curiously in 2.18.9 on Linux the project (and the single datasources) open just fine.

What can you say to us about those https addresses certificates?

#3 - 2017-06-13 01:55 PM - Giovanni Manghi

- Status changed from Open to Feedback

#4 - 2017-07-25 08:28 PM - Giovanni Manghi

- Resolution set to invalid
- Crashes QGIS or corrupts data changed from No to Yes
- Status changed from Feedback to Closed

Closing for lack of feedback.
