

QGIS Application - Feature request #16734

Per-layer option to display only legend items visible on current map to composer legend

2017-06-20 11:17 PM - Nikolay Lebedev

Status:	Feedback	Resolution: Copied to github as #: 24633
Priority:	Normal	
Assignee:		
Category:	Map Composer/Printing	
Pull Request or Patch supplied:		
Easy fix?:	No	
Description		
This checkbox is already there for atlas features. Legend displays only features visible on current atlas page. Since legend item has a "Map" property, linking it to a particular map, this should be an easy fix.

What about the green "funnel" icon? If I understand correctly this is what you're trying to do.

#2 - 2017-07-03 10:25 PM - Nikolay Lebedev

Yes it works, thanks Nyal, haven't noticed it in the first place. But I need it to work on a per-layer basis, not for all layers in the legend at once. Should I open a new feature request for that?
