

## QGIS Application - Bug report #16746

### Hide/Show attribute columns in attribute table fails after toggling column visibility

2017-06-22 03:18 PM - Andreas Neumann

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Attribute table	
<b>Affected QGIS version:</b> 2.18.9	<b>Regression?:</b> No
<b>Operating System:</b>	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b>	<b>Resolution:</b>
<b>Crashes QGIS or corrupts data:</b>	<b>Copied to github as #:</b> 24645

#### Description

Steps to reproduce:

1.  
Show an arbitrary attribute table
2.  
Right click a column-header and open the "Organize table columns" dialogue
3.  
Hide a single column unchecking a column check box and press ok to close the dialogue
4.  
Right click a column-header and open the "Organize table columns" dialogue again
5.  
Show the previously hidden column by turning the respective checkbox on and confirm with pressing ok

Bug: the column is not properly displayed, instead the column after the column to show takes the previous width of the column that fails to display
