

QGIS Application - Bug report #16752

Function Editor "New File" reset previous functions

2017-06-25 09:37 AM - Klas Karlsson

Status:	Closed	
Priority:	High	
Assignee:		
Category:	Expressions	
Affected QGIS version:	2.18.9	Regression?: No
Operating System:		Easy fix?: No
Pull Request or Patch applied:	No	Resolution:
Crashes QGIS or corrupts data:	No	Copied to github as #: 24651
Description		
<p>It seems like a click on the "New File" button (actually when you set the new file name), the function that is currently "selected" will be reset!</p> <p>By this I mean any edited code will be erased and replaced with the default startup code.</p> <p>There doesn't seem to be a way to undo this, so if you have written a lot of code in a function that has been reset, the code will be lost.</p> <p>The workaround is to create a "dummy" function that I select before I add a new file.</p> <p>Example:</p> <p>Skärmbild_2017-06-25_09-34-04.png</p> <p>Add new file, name it, press ok:</p> <p>Skärmbild_2017-06-25_09-35-04.png</p>

History

#1 - 2017-06-29 02:58 PM - Harrissou Santanna

- Operating System deleted (Linux Ubuntu 16.04)

I can confirm too (with master). Very embarrassing when you spent time to have a working code.

Also, The old file loses its icon in the list...

I Had it on windows so I removed the OS indication.

#2 - 2017-11-14 06:54 PM - Alexander Bruy

- % Done changed from 0 to 100
- Status changed from Open to Closed

Applied in changeset commit:qgis|d8398400f989147e8b9c89bf3c4beb87e2f8f97f.
