QGIS Application - Bug report #16762
DXF Export... does not work as in pre 2.18.9

2017-06-27 12:56 PM - Peter Wallström

Status:	Closed			
Priority:	Normal			
Assignee:				
Category:	DXF export			
Affected QGIS version:	2.18.9		**Regression?:**	No
Operating System:	Windows 10 and Windows 7		**Easy fix?:**	No
Pull Request or Patch supplied:	No		**Resolution:**	duplicate
Crashes QGIS or corrupts data:	No		**Copied to github as #:**	24661

Description

The bug:
When I'm making an export of .shp files for use in Microstation.

Pre 2.18.9 it would make a level corresponding to the name of the file, since 2.18.9 it will clutter the levels with one layer per shape.
Meaning instead of Filename.dxf the levels comes in like 194_9_P_FA (this is one shape) and it will create lots of levels (one per shape in the .shp file)

History

#1 - 2017-06-27 01:28 PM - Giovanni Manghi

- Easy fix? changed from Yes to No

- Status changed from Open to Feedback

I'm not sure if the change was by design or not, so I cannot say if is a regression or not. Jurgen?
