QGIS Application - Feature request #16808
Make autosaver plugin a core feature

2017-07-07 03:13 PM - Nikolay Lebedev

Status:	Open		
Priority:	Normal		
Assignee:			
Category:	Project Loading/Saving		
Pull Request or Patch supplied:	No	**Resolution:**	
Easy fix?:	No	**Copied to github as #:**	24707

Description

Please add ability to setup autosaving current project.

This is much needed since QGIS isn't perfectly stable, like OS it runs on, power outlets, etc.

Autosave event can be fired on any style change or timely or could be customised.

History

well... I personally could say the same for other plugins, actually I really think that tools like Group Stats, Table Manager and a few others should really be added to core... bottom line is that when code is added to qgis core it needs to be mantained, and of there is no one that commits to that then better keep stuff as plugins.
