

QGIS Application - Bug report #16815

Nightly build stopped updating

2017-07-08 03:06 PM - Patrick Dunford

Status: Closed	
Priority: Normal	
Assignee:	
Category: Build/Install	
Affected QGIS version: master	Regression?: No
Operating System:	Easy fix?: No
Pull Request or Patch supplied: No	Resolution: invalid
Crashes QGIS or corrupts data: No	Copied to github as #: 24714

Description

In the web page at this location <http://qgis.org/en/site/forusers/alldownloads.html>

I have followed the instructions to get the development build with these lines in /etc/apt/sources.list

```
deb http://qgis.org/debian-nightly xenial main
```

```
deb-src http://qgis.org/debian-nightly xenial main
```

The most recent build I can get from this is 1:2.99.0+git20170110+313ec55+24xenial or 313ec55

According to a web page <https://github.com/qgis/QGIS/tree/313ec55640adf3696d8b7554cc6d9b7fc319c2df> this version has not been updated since January.

Well that is about what one would expect as a new version has come out, however there apparently aren't any newer packages available in the nightly builds. I can't actually get my computer to install a newer version.

Is the issue due to my computer or are newer versions at a different address?

These instructions are from the Qgis website.

History

#1 - 2017-07-09 07:41 AM - Andre Joost

See <http://qgis.org/en/site/forusers/alldownloads.html#id15> :

"master for Xenial only available for ubuntuqgis (plain Xenial lacks GDAL 2)"

So either switch to ubuntuqgis with <http://qgis.org/ubuntuqgis-nightly> xenial main, or a newer OS version.

#2 - 2017-07-09 03:21 PM - Giovanni Manghi

- Resolution set to invalid

- Status changed from Open to Closed
