Is this a question? a bug report? in both cases you need to add more details, what are you trying to do/achieve?

I think this is a bug.

I build qgis(master) in visual studio 2015 x64, Qt5.7.1�.....,

And I also want to know how to resolve this problem.
UnicodeDecodeError: 'utf-8' codec can't decode bytes in position 4216-4217: invalid continuation byte

In both cases (especially the first) I would prefer you to ask in the developers mailing list, we must be sure this is bug and not just having a hunch. In case the bug is confirmed then we can reopen this. Thanks.
