Category:	GRASS		
Affected QGIS version:		**Regression?:**	No
Operating System:	OS X	**Easy fix?:**	No
Pull Request or Patch supplied:		**Resolution:**	fixed
Crashes QGIS or corrupts data:		**Copied to github as #:**	11744

Description

I'm testing the integration of QGIS-HEAD with the RC4 of Grass 6.4.
The problem is that I simply cannot import a mere Shapefile in the dataset using v.in.ogr. Whereas the function works correctly in a standalone execution of Grass, in Qgis I get the message "the plugin was killed" and no output whatsoever.

I'll see what's wrong when I have a moment, most probably by the end of the week.

History

#1 - 2009-05-15 12:26 PM - vince -

- Resolution set to fixed

- Status changed from Open to Closed

Ok, it has been corrected in HEAD. Thanks
