

QGIS Application - Bug report #16861

Arranging layer order by dragging not working

2017-07-13 12:25 PM - Frank Sokolic

Status: Closed	
Priority: High	
Assignee:	
Category: Map Legend	
Affected QGIS version: master	Regression?: Yes
Operating System: Ubuntu 17.04 Unity desktop	Easy fix?: No
Pull Request or Patch supplied:	Resolution: fixed/implemented
Crashes QGIS or corrupts data:	Copied to github as #: 24760
Description	
Arranging layers by dragging and dropping in the layers panel doesn't work properly. When I select a layer and then drag it while holding down the left mouse button the layer gets 'dropped' even though the mouse button hasn't been released.

- Priority changed from Normal to High

#2 - 2017-09-11 04:16 PM - Patrick Dunford

I see "unusual" drag and drop behaviour all the time in (x)ubuntu in lots of different apps. Can you be sure this is not an issue with other applications.

#3 - 2017-09-11 05:18 PM - Giovanni Manghi

- Status changed from Open to Feedback

#4 - 2017-09-13 08:07 AM - Frank Sokolic

Have just checked and this problem no longer occurs so I think that this ticket can be closed.

#5 - 2017-09-13 10:01 AM - Giovanni Manghi

- Resolution set to fixed/implemented

- Status changed from Feedback to Closed
