Pull Request or Patch supplied:	Resolution:
Easy fix?: No	Copied to github as #: 24761
Description	
<p>Creating an OWS Server in the Project Properties tempts me to use the keyboard to fill out the form: short-name, title, organisation, etc.</p> <p>Observed behaviour: Switching with the TAB key through the dialog jumps from short-name to Inspire and WCS Capabilities and keeps stuck there. If you begin with title, TAB goes to organisation, online-resource, person but then to e-mail and phone and up to position.</p> <p>Expected behaviour: It would be nice if the jumping with TAB would follow the order of the form elements from top to bottom.</p> <p>Reasons: It makes filling out the form easier, polishes the UI and leads to a more consistent work on the interface.</p> <p>System Information (sorry, the dialog is in German):</p> <ul style="list-style-type: none">- System: Ubuntu 16.04- QGIS-Version 2.18.10- QGIS-Codeversion 59e0f78- Kompiliert gegen Qt 4.8.7- Laufendes Qt 4.8.7- Kompiliert mit GDAL/OGR 1.11.3- Läuft mit GDAL/OGR 1.11.3- Kompiliert mit GEOS 3.5.0-CAPI-1.9.0- Läuft mit GEOS 3.5.0-CAPI-1.9.0 r4084- PostgreSQL-Client-Version 9.5.2- SpatiaLite-Version 4.3.0a- QWT-Version 5.2.3- PROJ.4-Version 492- QScintilla2-Version 2.9.1
