<b>Affected QGIS version:</b> 2.18.10	<b>Regression?:</b> No
<b>Operating System:</b> Windows 7	<b>Easy fix?:</b> No
<b>Pull Request or Patch supplied:</b> No	<b>Resolution:</b> not reproducible
<b>Crashes QGIS or corrupts data:</b> No	<b>Copied to github as #:</b> 24764

**Description**

Not sure if this is a local issue or a software issue.

I am not able to add a new print composer because the Composer Title dialog box is blank, very small, and not sizeable. I am in need of composing a new map for a job. Any suggestions?

Thank you!

- Priority changed from Normal to Low
- Status changed from Open to Feedback

It is of course 99.999% a local issue. In your situation I would try remove the QGIS entries in Windows registry with regedit.exe: please note that this will reset QGIS as it would be just installed for the first time, but also will reset configurations, options, etc.

#### #2 - 2017-09-25 04:36 PM - Giovanni Manghi

- Resolution set to not reproducible
- Status changed from Feedback to Closed

Closing for lack of feedback, please reopen if necessary.
